HERE'S MY STORY:

I am a full stack web developer with an emphasis on clean responsive website. My current stack is- -MongoDB -Express -React -Nodejs, now I'm concentrated on React-app development. i can create website from scratch to deployment, My goal is to write clean, highest performance and test covered code in order to provide smooth and bugs free software. Back in days, I was working a lot with vanilla javascript, JQuery, nodejs, mongodb and other frontend and backend framework avialable out there.
